

Assignment F3

Jumping Up

“Jumping Up” is a top complaint among big dog owners. Dogs jump up naturally to get attention, but this behavior can be overwhelming and sometimes painful to people. In this assignment, you’ll practice developing a training program for clients who are struggling with their dogs jumping up. Refer to the text, “*Addressing Unwanted Behaviors*” to complete this assignment.

As you know, there’s never “one way” to train a dog. The effectiveness of a training strategy will depend on the behavior, the dog and the dog owner. Describe three strategies you could use to discourage a dog from jumping up. Explain why each strategy would be effective. Write your answers as if you were sharing them with a client.

Strategy 1

Description:

Why would this strategy be effective?

Strategy 2

Description:

Why would this strategy be effective?

Strategy 3

Description:

Why would this strategy be effective?
